

CanGulf Engineering Fzc.

Electrical and Electronic systems, Panels, Instrumentation & Controls, Automation.

Heat Control Panel For Chemical Reactors

SCADA Controlled MCC Panel for Chemical Plant

- ➔ Package Sub-Stations
- ➔ Main Switch boards
- ➔ Distribution Panels & Cabling
- ➔ Motor Control Centres
- ➔ Variable Speed Drives
- ➔ Instrumentation Panels
- ➔ Lighting Management Panels & Solar Energy
- ➔ Power Factor Correction Equipment
- ➔ Maintenance Contracts
- ➔ PLC & SCADA Automation panels

Objectives

The aim of CanGulf Engineering is to provide State of art technological solutions for their clients.

To undertake turnkey projects from design to supply, installation & commissioning of various kinds of customized electrical and electronic, control and instrumentation systems, all kinds of paneling and cabling by utilizing finest materials and equipment to their customers.

To provide customized solutions for the customers in the design, manufacturing, supply, installations and commissioning of various kinds of engineering products, machinery and equipments and in their operation and controls.

Our Team

The planning and execution is carried out from our office where the expertise in organizing, planning and control is available from our highly qualified and experienced staff and personnel that have a combined management experience of 75 years in planning, operations, maintenance, & quality management of heavy and light engineering industry.

We follow the ISO 9000, OHSAS 18000 guide lines in our management trying to improve continuously.

We have at our disposal a wealth of experience in our associates and vendors who can handle and supervise any complex project. We obtain our supplies from world renowned suppliers and manufacturers, utilizing the best as required by our customers.

Services

We provide advisory services for many industries for the efficient operations and control of their plants.

If you want to improve the efficiency of your plants We can also study and produce various kinds of engineering and financial reports, feasibility analysis, marketing studies, planning, analysis & control systems, reporting systems, QM systems, performance management systems specific to the need of the customers for their operations and maintenance.

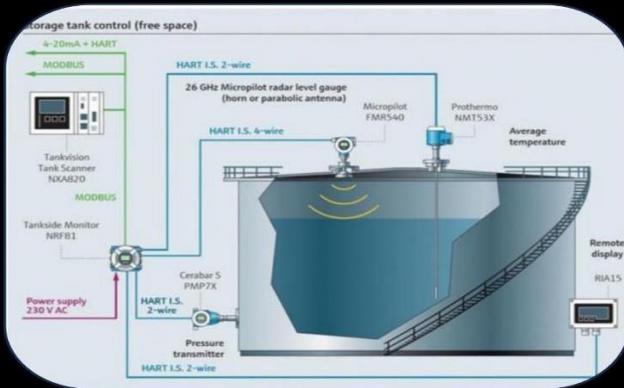

We try to meet to the best of our ability customer expectations in all our dealings from enquiries to final supply and handing over of the products or contracted items conforming to the best engineering practices.

CanGulf Instrumentation and Integration Systems

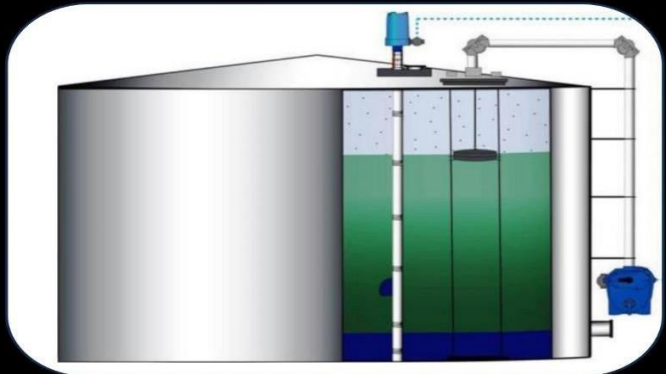

Tank Level, High Level & Low level

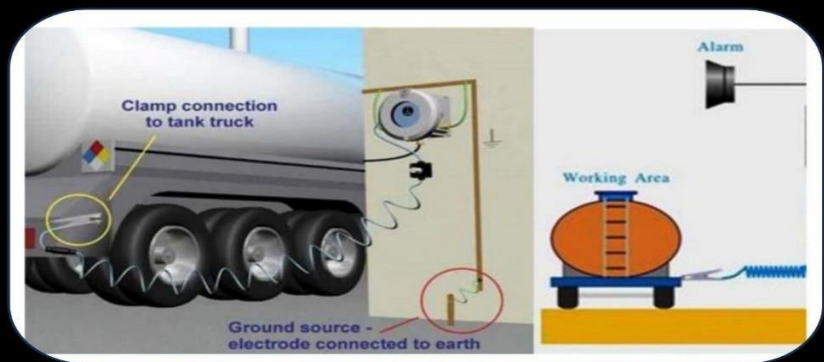

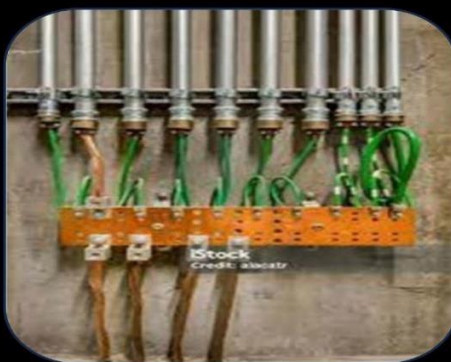

CANGULF Engineering FZC supplies Tank Gauging solutions, Tank level with highly accurate and intelligent measuring instruments. This solution is suitable for the trend of industrial modernization and meets the standard decree

The system consists of a field device and the data collection system, computation, and data display in the control room

Truck and Storage Tanks Earthing System:

- CanGulf is providing earthing solutions for trucking loading and unloading systems
- Storage tanks earthing and lightning system with earth Pits as per UAE earth standards. Earthing installations. Earth material supplies

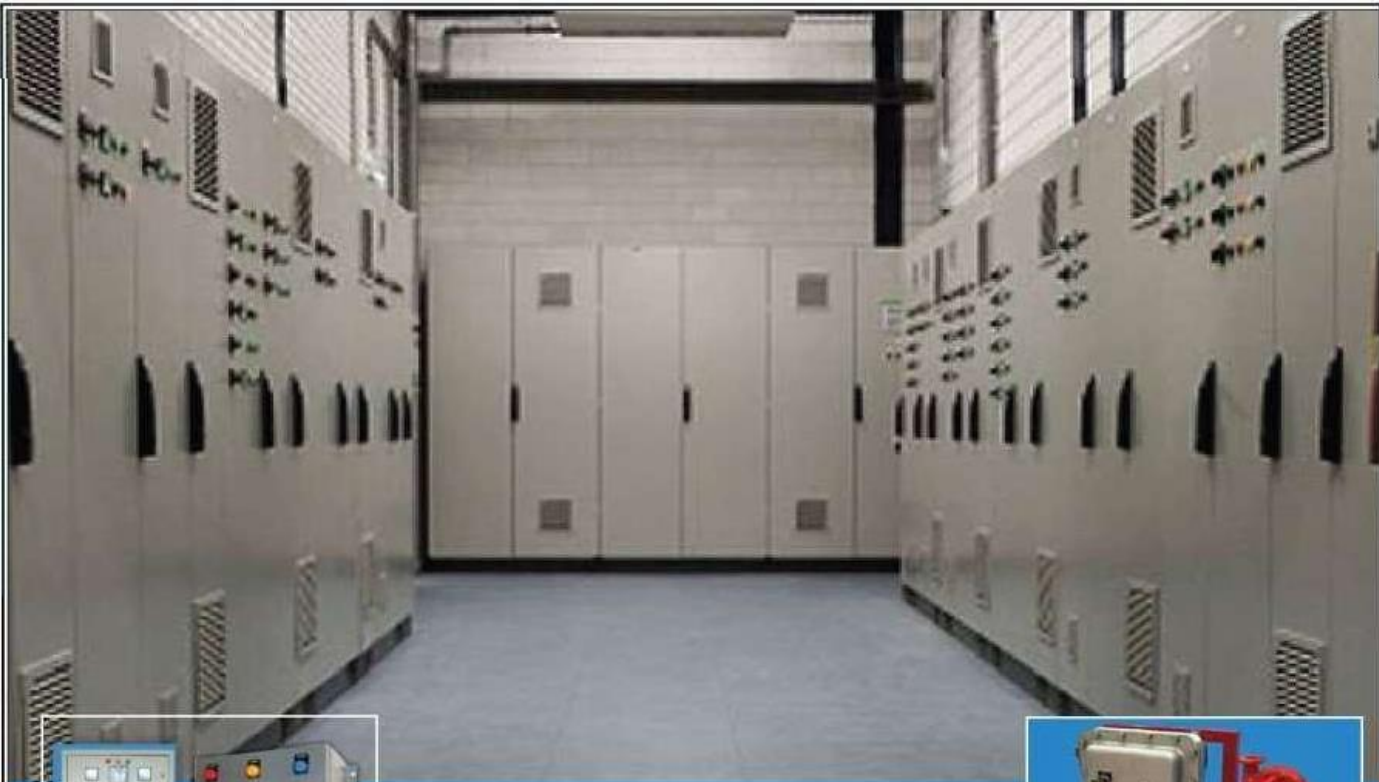

Engineering Solutions & Technical Supplies.

- Oil and Gas Field Instrumentation.
 - Tank Gauging Systems.
 - Truck Loading Systems.
 - Batching System.
- Electrical Instrumentation.
- Process Field Instrumentation, Flow metering, Pressure Level, Temperature.
- MOVs, ROSOVs, Shutoff valves, Positioners, Valves and Fittings.
- Industrial Automation, PLC, SCADA Systems.
- Explosion Proof Lighting, Control stations and Power Distributions.
- Turn Key EPC Projects.
- Commissioning & Maintenance.
- Control Panel Design & Build.
- Engineering & Technical Procurement.
- Earthing & Lightening solutions.

Project References.

CanGulf provides Engineering, Contracting and Maintenance services in the finest way for wide variety of clients in both domestic and international markets.

- ❖ OSCAR LUBRICANTS AJMAN PLANT.
- ❖ OSCAR TERMINAL JABAL ALI Port.
- ❖ Emirates Refinery AJMAN.
- ❖ PRONIVA INDUSTRIES AJMAN.
- ❖ Iffco Chemicals Sharjah.
- ❖ General Petroleum Sharjah.
- ❖ ATL Paints Sharjah.
- ❖ Asia Petroleum Sharjah (Terminal Operations).
- ❖ Chiemi Tech Terminal Sharjah.(Terminal Operations)
- ❖ Falcon Refinery UMQ.
- ❖ Premier Lubricants UMQ.
- ❖ DEVIA Food Industries UMQ.
- ❖ Anchor Allied Industries Silicon Plant UMQ.
- ❖ Anchor Allied Paint Plant in Sharjah.
- ❖ Anchor Allied Industries RAK.
- ❖ SUNLUBE industries RAK.
- ❖ Kleene Lub Refinery Al Ghail RAK.
- ❖ Concrete Technology RAK.
- ❖ RAK Properties RAK.

Testing

Testing and inspection of the material and items being manufactured is carried throughout the process controls stages by our experienced staff or if required by the customers, by third party inspectors.

The completed products are further rigorously tested according to the relevant BS or IEC or equivalent standards required. Full functional testing is carried out on all the Motor Control Panels by simulation of the process.

After sales service

CanGulf Provides after Sales Service to all its customers in form of a call service or Contracted Maintenance Service. This service is backed up by experienced engineering staff and is available on an agreed basis to meet the individual requirements of our customers.
